MEDICAL EDUCATION AND LIFESTYLE!

BMC was founded in 2005, and it is located at North Obhur in Jeddah. BMC has nine programs in medical and health sciences and accommodates up to 7,000 students. It’s accredited by the Education and Training Evaluation Commission and recruits highly qualified faculty members. BMC provides excellent training opportunities for students at the Ministry of Health hospitals and Saudi German Hospital Group.

REGISTRATION PROCESS

OFFERED PROGRAMS IN BMC

BMC offers the following Bachelor's degree programs

#	Program	Study Period			Semester tuition fees
		Preparatory	Academic	Internship	
1	Preparatory year		1 year		SR 30.000
2	General Medicine Practice	1 year	5 year	1 year	SR 45.000
3	General Dentistry **(Sponsored)**	1 year	5 year	1 year	SR 37.500
4	Pharm-D (Pharmacy)	1 year	4 year	1 year	SR 35.000
5	Respiratory Therapy	1 year	3 year	1 year	SR 35.000
6	Physical Therapy **(Sponsored)**	1 year	3 year	1 year	SR 27.500
7	Radiological Sciences **(Sponsored)**	1 year	3 year	1 year	SR 27.500
8	Occupational Therapy **(Sponsored)**	1 year	3 year	1 year	SR 25.000
9	General Nursing	1 year	3 year	1 year	SR 27.500
10	Health Management **(Sponsored)**	NA	4 year	NA	SR 22.500

Registration Fee:
Registration Fee is 4500 SR.

APPLICATION PROCESS

Prospective students must apply to BMC directly through our website at www.bmc.du.sa

REQUIREMENTS FOR SAUDI HIGH SCHOOL GRADUATES (SAUDI CURRICULUM)

1. Applicant must have high school certificate in science.
2. Applicant must have Qudrat and Tahsili results.

REQUIREMENTS FOR INTERNATIONAL HIGH SCHOOL GRADUATES (INTERNATIONAL CURRICULUM)

1. Applicant must have high school certificate with science subjects attested by the concerned ministries.
2. For British curriculum, applicants can apply by A or AS levels.

Notes

- High school applicants will join Preparatory Year. After that they will be accepted in the program based on their choices, merit and availability of seats.
- There is no Preparatory Year for Health Administration program.

REQUIREMENTS FOR TRANSFER APPLICANTS FROM OTHER COLLEGES AND UNIVERSITIES

Transfer students from other colleges or universities can apply to any Bachelor's degree program at BMC.

Requirements

- High school certificate.
- Academic transcript.
- Course specification for completed subjects by applicant.

REQUIREMENTS FOR BRIDGING APPLICANTS

1. BMC accepts applicants with diplomas in all programs except Medicine program.
2. Bridging applicants can only join the programs in which they have earned their previous diplomas.
3. Applicants having diploma of 3 years or more may join from the 3rd year of program.
4. Applicants having diploma less than 3 years may join from the 2nd year of program.

Documents required

- High school certificate.
- Certificate and transcripts of earned diploma.
- No objection letter from the applicant employer (if the applicant is working).
- TOEFL or IELTS or any equivalent Certificate.

SCHOLARSHIP & FINANCIAL AID

Batterjee Medical College (BMC) aims to contribute effectively in community services, and to help students to achieve their goals. It offers full and partial scholarships and financial support programs, which are considered the best in the Kingdom of Saudi Arabia.

AL-FORSAN SCHOLARSHIP

Al-Forsan Scholarship is designed for students with excellent academic achievement and ability to make a difference in community service. It covers a student's tuition fees up to 600,000 Saudi Riyals.

Scholarship Requirements

- **Academic excellence**
  Candidates must have high academic performance. They must present their grades, and certificates of excellence previously obtained.
- **Personal Skills**
  Candidates must have leadership, team work and positive communication skills.
- **Social Responsibility**
  Candidates must be willing to participate in community service.
- **Al-Forsan Test**
  Candidates must pass Al-fursan test on the science subjects, held in BMC.
- **Personal interview**
  Candidates must pass the personal interview with the grant committee.

Program Features

- Full (100%) and partial scholarships (50% or 30%)
- Available for all academic programs
- Available for all nationalities
- Available for new registered students and current students in BMC.

* Terms and conditions apply.

DAAEM PROGRAM

This program aims to improve the level of education and prepare qualified members in the medical field to meet the needs of the labor market. The program alleviates financial pressures on the family in paying the tuition fees.

Program Features

- Paying 50% of the tuition fees during the study period.
- Paying 50% of the remaining fees after graduation in instalments in a period equal to the years of study.
- Available for all nationalities

Fees and payment period for the included programs

#	Program	Study Period Including (PY)	Semester tuition fees	Daaem Semester Tuition Fees	Installments After Graduation
1	Preparatory Year (PY)		SR 30,000	SR 15,000	
2	General Dentistry (Sponsored)	7 year	SR 37,500	SR 18,750	84 Month
3	Pharm-D (Pharmacy)	6 year	SR 35,000	SR 17,500	72 Month
4	Respiratory Therapy	5 year	SR 35,000	SR 17,500	60 Month
5	Physical Therapy (Sponsored)	5 year	SR 27,500	SR 13,750	60 Month
6	Radiological Sciences (Sponsored)	5 year	SR 27,500	SR 13,750	60 Month
7	Occupational Therapy (Sponsored)	5 year	SR 25,000	SR 12,500	60 Month
8	General Nursing	5 year	SR 27,500	SR 13,750	60 Month
9	Health Management (Sponsored)	4 year	SR 22,500	SR 11,250	48 Month

* Terms and conditions apply.

TOMOH PROGRAM

Tomoh program offers opportunities for applicants to study free of charge during the study period and to pay the tuition fees after graduation in installments.

Program Features

- 0% cost during the study period.
- Paying the tuition fees after graduation in instalments in a period equal to the years of study.
- Available for all nationalities.

Programs included

#	Program	Study Period	Installments after Graduation
1	Physical Therapy **(Sponsored)**	5 year	60 Month
2	Radiological Sciences **(Sponsored)**	5 year	60 Month
3	Occupational Therapy **(Sponsored)**	5 year	60 Month
4	General Nursing	5 year	60 Month
5	Health Management **(Sponsored)**	4 year	48 Month

* Terms and conditions apply.

TAMKEEN PROGRAM

The program aims to support students in achieving their scientific goals, by supporting students financially in the preparatory year either fully or partially for all nationalities.

TAMKEEN 100%

Requirements

- HIGH SCHOOL (Saudi Curriculum)
  High School: 95%,
  Tahsili: 80%,
  Qudrat: 80%
- HIGH SCHOOL (International Curriculum)
  High School: 95%

Program Features

- 100% off the preparatory year tution fees.

TAMKEEN 50%

Requirements

- HIGH SCHOOL (Saudi Curriculum)
  High School: 90%,
  Tahsili: 70%,
  Qudrat: 70%
- HIGH SCHOOL (International Curriculum)
  High School: 90%

Program Features

- SR 30,000 off the preparatory year tution fees.

* Terms and conditions apply.

EHSAN SCHOLARSHIP

Ehsan scholarship aims to support orphans who are under the supervision and care of the Ministry of Human Resources and Social Development, by providing a full tuition fee scholarship to them.

Scholarship Requirements

- **Initial nomination by the Ministry of Human Resources and Social Development.**
  High School: 90%,
  Tahsili: 70%,
  Qudrat: 75%
- **Passing the college interview**

Programs included

- Radiological Science
- Health Administration
- Nursing
- Physical Therapy
- Occupational Therapy

* Terms and conditions apply.

MASLAK PROGRAM

Maslak is an educational financing program dedicated to bachelor degree students. This program gives the opportunity to student to study and pay the tuition fees during and after graduation on instalments with zero interest. The program was established by Al-Rajhi Foundation for Development Finance and in collaboration with Batterjee Medical College for Science and Technology.

Program Features

1. **0% interest loan.**
2. **Opportunity to study Bachelor's degree.**
3. **Available for all nationalities.**
4. **Available for new registered students and current students in BMC (Preparatory Year excluded).**

Programs included

- Medicine
- Dentistry
- Pharmacy
- Respiratory Therapy
- Physical Therapy
- Occupational Therapy
- Radiological Sciences
- Nursing
- Healthcare Administration

* Terms and conditions apply.

EDUCATIONAL LOAN (ALINMA BANK)

Alinma Finance is an educational financing program that helps the student to achieve his dream by paying the tuition fees in installment during the study period. The program was established by Alinma Bank for Educational Financing and in collaboration with Batterjee Medical College for Science and Technology.

Program Features

1. 0% interest loan with an easy payment throughout the year.
2. The program is available to both current and new students.
3. The program is available to all nationalities (Saudis and Residents).
4. Available for all academic programs.

* Terms and conditions apply.

IQRAA SCHOLARSHIP

It is a partial scholarship in collaboration between BMC and Dallah Al Baraka Holding Group.

* Terms and conditions apply.

ABNA'A AL SHUHADA'A SCHOLARSHIP

To support the children of the martyrs of the homeland, BMC provides a full tuition fee scholarship to them.

Programs included

- Radiological Sciences
- Nursing
- Health Administration
- Physical Therapy
- Occupational Therapy

* Terms and conditions apply.

EXCELLENCE SCHOLARSHIPS

a) High school graduates

- SR 12,000 off the preparatory year tuition fees for the students achieving 90% and above.

b) Transferred students from other universities:

- Discount on the first academic year tuition fees for students achieving GPA 4 and above.

c) BMC regular students:

- Discount of the next academic year tuition fees for students achieving 95% and above.

#	Program	Annual Discount Amount
1	Preparatory Year (PY)	SR 6,000
2	General Medicine Practice	SR 9,000
3	General Dentistry (Sponsored)	SR 7,500
4	Pharm-D (Pharmacy)	SR 7,000
5	Respiratory Therapy	SR 7,000
6	Physical Therapy (Sponsored)	SR 5,500
7	Radiological Sciences (Sponsored)	SR 5,500
8	Occupational Therapy (Sponsored)	SR 5,000
9	General Nursing	SR 5,500
10	Health Management (Sponsored)	SR 4,500

* Terms and conditions apply.
* Discounts will be applied in the 2nd semester.

EXCEPTIONAL DISCOUNTS

Program Features

- 5% discount for each sibling.
- 50% for employees' children in BMC and Saudi German Hospital Group.
- All discounts will be applied on second semester for the academic year tuition fee.

* Terms and conditions apply.

A BMC EDUCATION CREATES OPPORTUNITIES

BMC's medical education is designed to meet the demands of today's labor market — graduates leave BMC confident, prepared and equipped with the education & skills necessary for employment in the medical field.

> *"We aim to increase the national workforce and create jobs in the private sector in order to provide decent opportunities for our youth and women in line with the Kingdom's Vision 2030 and the goals of the National Transformation Program 2020."*
>
> Eng. Sobhi Batterjee

BMC
BELIEVES
IN YOU

YOU ARE QUALIFIED FOR THE MEDICAL INDUSTRY REQUIRE-MENTS

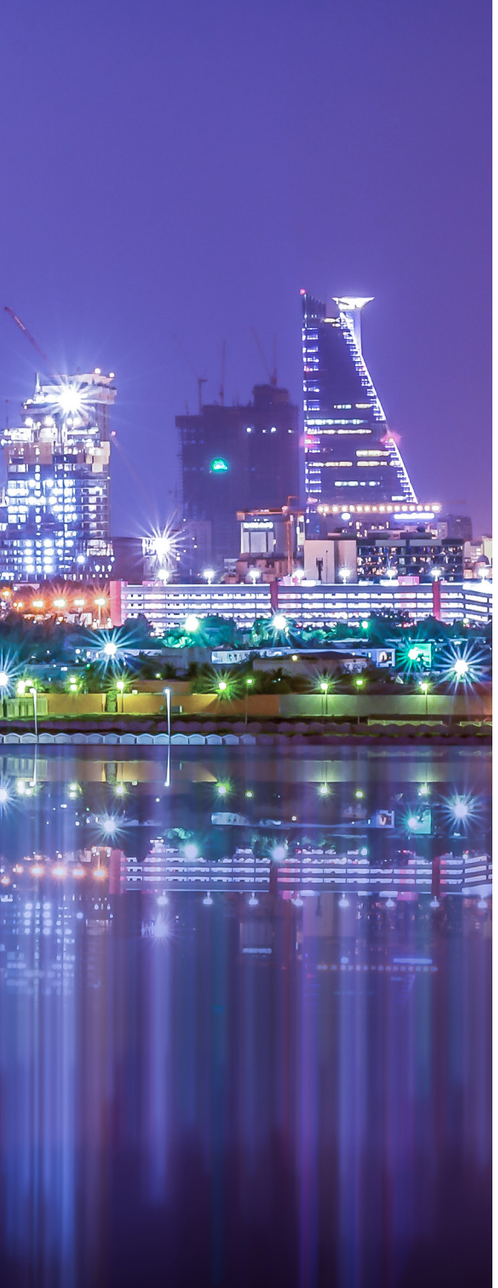
BMC OFFERS

- Financial Aid Programs
- Scholarships
- Various academic programs
- Highly qualified & experienced academic staff
- Students from different nationalities
- An ever-evolving, well established campus
- Sports facilities
- Various student clubs & community services
- A stately halls auditorium
- A fully-equipped virtual hospital
- Numerous laboratories for each program
- Female Hostels

And much more!

WE ARE ALIGNED

In alignment with the Kingdom's Vision 2030, we are setting a direction that builds and expands upon our historic strengths and honors the core values that have made BMC such a unique educational institution.



BATTERJEE MEDICAL COLLEGE

OUR ROLE IN THE KINGDOM'S VISION 2030

OUR VISION

To become a renowned benchmark of innovative and excellent medical education.

The establishment of BMC has been the realization of a dream, a dream that contributes greatly to the medical and healthcare industry in the Kingdom through providing utmost quality in medical education. Our Vision is characterized through creating a culture of research and continuous improvement in both learning and teaching methodology, as well as healthcare service delivery. BMC seeks to set the precedent for exclusive medical education institutions in a manner that regional and international colleges heed our medical education outcomes. Ultimately, our key focus will be exemplified in the form of ethical, knowledgeable, skilled, competent, tolerant, civilized, cultured and value-ridden healthcare professionals.

OUR MISSION

To contribute significantly to society through unsurpassed medical education, community service, and research while maintaining core values

Our Mission emphasizes the requirement of regional and international medical institutions and the improvement of such through three important pillars of medical education: 1) Knowledge, 2)Skills applied for greater health benefits of the community, and 3) developing new paradigms, models, products and services. The BMC Mission is to provide unmatched and a high standard of medical education, which means education will be delivered by using input, process, output and outcome theme.

WHO WE ARE

In the year 2003, the Batterjee family found itself making a crucial change to the history of higher education in the Kingdom of Saudi Arabia: the establishment of Batterjee Medical College, now the MENA region's largest private institution for medical and health sciences.

OUR STORY

BATTERJEE MEDICAL COLLEGES

On october 18th, 2003, in a noteworthy ceremony attended by his Excellency and Royal Highness Prince Mishal bin Majed bin AbdulAziz, Governor of Jeddah, the first stone for the foundation was laid, and thus began the establishment of Batterjee Medical College for Science and Technology.

Constructed on 100,000 square metres of land in Obhur, the college has gone on to become one of the most modern, state-of-the-art institutions within its industry, and boasts a sizeable capacity of accommodating more than 7000 students throughout nine specialized health sciences programs for the benefit of the booming healthcare industry in the Kingdom.

BMC has seen rapid change and growth over the years, with a multitude of accomplishments, among the first of which was the Tuebingen German University Collaboration, followed by the King AbdulAziz University in Jeddah. BMC has established a strong affiliation with Maastricht University in the Netherlands, and is recognized by the World Health Organization (WHO) along with the Foundation for Advancement of International Medical Education (FAIMER).

Currently, in 2017, we have embarked on retaining the necessary qualities to continue being a leading force aligned with Vision 2030 in progressing the Kingdom's efforts forward to achieving its vision, as well as meet the requirements for the current phase of the National Transformation Program 2020.

Clearly, the momentum for growth and change at BMC is unyielding, and we ultimately are playing a key role in the fast-changing era of the Kingdom. The entire BMC campus community can look forward to a bright future for a truly great institution.

OUR PROMISE

BMC will strive to create an increasingly eminent, formidable, and strong academic community.

NATIONAL COMMISSION FOR
ACADEMIC ACCREDITATION AND ASSESSMENT

NCAAA ACCREDITATION

BMC HAS ATTAINED NCAAA INSTITUTIONAL ACCREDITATION

BMC is proud to have recently attained NCAAA accreditation to secure its relationship of trust locally and internationally with all stakeholders.

Despite this achievement, we are dedicated to continuously working hard to ensure that high quality and standards are upheld in the management and delivery of learning outcomes achieved by students, as well as aspiring to achieve high quality international standards throughout the college. Generally, accreditation is public recognition that quality assurance Standards are met in the management and delivery of learning outcomes achieved by students. Standards must be equivalent to high quality international Standards. Accreditation means TRUST. It means that we can trust the university, institution, college, program, or department.

BMC's initial existence was one that portrayed the concept of quality medical education. From the day of its inception, the BMC team always strived to create, support and encourage an atmosphere of high standards and culture, which paved way to continuous quality improvement in learning and teaching of medical education and student satisfaction beyond their expectations. In March 2016, BMC signed an agreement with NCAAA for starting the Institutional Review and Accreditation Process. In July 2017, BMC submitted action plans for working recommendations of the review panel, and by December 2017, BCM's dedicated team saw the fruits of their immense efforts when BMC Jeddah attained the Institutional Accreditation approved by the Higher Committee of NCAAA.

DIGITAL TRANSFORMATION

In line with the Kingdom’s vision 2030, Batterjee Medical Colleges adopted a plan for digital transformation and creating a new experience for students and faculty members with a package of electronic services integrated into a single electronic platform to facilitate their procedures and raise learning and teaching achievements.

DIGITAL PLATFORM

Redefining e-learning by linking and integrating electronic solutions and students’ services, faculty members, and scientific research sources into a comprehensive, adaptable, and customizable platform that would push the wheel of education into a unique experience with the principle of unifying the electronic experience with the spatial experience.

Blackboard
LEARN ULTRA

Batterjee Medical Colleges rely on **Blackboard** to manage the learning process, where students can communicate with their lecturers and mates through a set of tools available on the platform. Discussion rooms, virtual classes, and study groups are some of the unique features. In addition, it allows viewing, downloading, printing lectures, study resources, and developing scientific research skills by following up on the citation percentage while preparing projects, research, and evaluating them using scientific standards.

PeopleSoft

Oracle PeopleSoft Student Records System enables us to minimize duplication of all academic information entry and it is easy to trace and operate with the highest degree of record control from subject descriptions, class schedules, and student assessment in conjunction with academic advising from post-admission to graduation.

ExamSoft

Batterjee Medical Colleges rely on **ExamSoft** as part of the quality of output improvement plan. It links learning outcomes to courses, programs, and measures what has been achieved (student and program), which will contribute to the assessment separation from teaching, similar to standardized tests.

It is a part of the digital transformation plan and the replacement of traditional paper-based exams with tests that can be done via smart devices as part of the student›s digital experience in the college.

OUR PROGRAMS

In addition to the Preparatory Year, BMC offers eight different specialties within the Medical Field.

MEDICINE

BMC offers a Bachelor's Degree in Medicine and Bachelor's Degree in Surgery (MBBS) within the Medicine Program.

In line with the global trend in medical education for medicine, BMC's Medicine Program is depending on Case-Based Learning (CBL). It is a teaching method in which real-world problems are used as the vehicle to promote student learning of concepts and principles as opposed to direct presentation of facts and concepts. This method of learning promotes the interactive and engaging participation while clinical skills being developed from the primary years of study.

Based on that, the college established a partnership with the University of Maastricht in 2013.

The teaching staff has been trained in medical education units by both of the University of Maastricht of the Netherlands and the University of Qassim through many workshops and training courses.

DENTISTRY

BMC's Dentistry Program offers a professional dental degree which was approved and began in 2007 with more than 40 academic experts in different specialties.

The degree provides an engaging and enjoyable study environment, which nourishes a passion for lifelong learning with a strong focus on developing professional behavior and communication skills. BMC Dental graduates' future has been promising. Most of them are pursuing further education and/or working in different government and private clinics/hospitals.

Batterjee Medical College is proud to announce the Dentistry program has obtained full institutional accreditation from the Saudi Commission for Health Specialties; valid until 2025. The five newly accredited programs with full training access at the BMC dental clinics are the following:

- Prosthodontics
- Endodontics
- Pediatric Dentistry
- Orthodontics
- Restorative Dentistry

DOCTOR OF PHARMACY - PHARM-D

Batterjee Medical College (BMC) started the Doctor of Pharmacy program in 2008 in response to the demand for qualified clinical pharmacists in Saudi Arabia.

The Doctor of Pharmacy Program (Pharm-D program) is responsible for preparing students to begin the practice of pharmacy as a vital member of a functional healthcare team. Pharmacists are medication experts and have multiple roles, which ranges from clinical pharmacist in hospitals, Pharmaceutical Industry, community settings to educators, researchers and consultants in many other settings.

Batterjee Medical College has been granted the certification from the American Accreditation Council for Pharmacy Education (ACPE) for its PharmD Program as the first private college and the fourth college in the Kingdom.

RESPIRATORY THERAPY

Noting the urgent need for such a vital specialization in the Kingdom in the current era of progression, BMC's Respiratory Therapy program was established to fulfill a great and crucial role in the Medical industry, and is also the first of its kind in the Western region of the Kingdom.

The study in BMC's new Respiratory Therapy Program prepares students to become Respiratory Therapists who are responsible for the treatment, management, diagnostic evaluation, and care of patients with deficiencies and abnormalities of the cardiopulmonary (heart & lung) system. The program aims to maintain accreditation by meeting new essentials and updating those set by the Saudi Commission for Health Specialties in respiratory care and clinical practice, as well as utilize the BMC Research Center to promote and conduct research in the respiratory field.

PHYSICAL THERAPY

BMC offers its four-year full-time Physical Therapy program curriculum followed by a one-year internship leading to a Bachelor of Science degree.

The program provides a structured background for most of the topics taught in the successive years where students begin to study basic information related to physical and therapeutic exercises & electro-physical agents with emphasis on physical therapy examination procedures. They will also have part-time clinical practice to build up their clinical sense & to provide a real-life situation for practice.

RADIOLOGIC SCIENCES

BMC's Bachelor's Degree in Radiologic Technology in Medical Imaging field provides the Kingdom's medical institutions with well-trained Radiologic Science Technologists who are qualified with knowledge, skills, and suitable experience to work in Diagnostic Radiologic Science fields effectively and positively.

Graduates of the program will be able to perform well in the following: Diagnostic Radiologic Science Techniques, Ultrasound imaging procedures, MRI unit imaging procedures Nuclear Medicine Unit imaging procedures, Therapeutic Radiologic Science imaging procedures, Administrative & Organizational Tasks of Radiologic Science Technicians.

OCCUPATIONAL THERAPY

Occupational Therapy is considered one of the most recent and rare specialties in the Kingdom of Saudi Arabia and the Arab world, and we at Batterjee Medical College (BMC) are proud to be the first World Federation of Occupational Therapists (WFOT) approved OT program in the Saudi private sector higher education. Our advanced education supports students development as Occupational Therapy practitioners and professional leaders.

It is a humanistic and a health specialty that aims to enhance a person's ability and improve functional performance in terms of independence, safety and quality in the various functions and activities of daily life of value and meaning to individuals and groups. The occupational therapist supports motor, mental and social skills and helps create a better place for functional participation in society. Scientific research has proven that Occupational Therapy services are effective and successful, and that the inclusion of an occupational therapist in the multidisciplinary medical rehabilitation team improves the integrated planning of treatment for people with disabilities and injuries of all kinds and for different age groups.

NURSING

The Nursing program offers a Bachelor's of Science Degree in Nursing (BSN), and fully supports a culture of ethics and equity, along with adherence to academic policies, practices, and supports diversity in teaching, learning, and work environments.

Our Nursing program educates undergraduates to provide safe, competent and compassionate nursing care that is grounded in theory and professional standards. Students will be prepared to practice nursing work collaboratively with individuals, families, groups, and communities in a variety of health settings: critical care, public health, mental health, nursing management, pediatric, obstetrics/ gynecology and nursing research, to seek optimal health and the well-being of all citizens.

HEALTH ADMINISTRATION

BMC's undergraduate program in Healthcare Administration is designed to address the future needs of managing quality systems through providing leaders that continuously strive for enhanced quality in service delivery. Healthcare Administration is a major for students interested in management and quality of healthcare as per consumer expectations.

The specific aim of the program is to deliver an environment, which will facilitate in disseminating knowledge, skills, competencies and values that tend to address the working need of entry-level management positions or master level education in the healthcare administration or management field.
